

UNDERSTANDING: Global warming poses a serious threat to people and natural systems across the planet. Public and private policy decisions about global warming this decade will have impacts lasting for generations.

RESOLVED: To focus the nation's attention on this crucial issue, Warren Wilson College Student Caucus, in conjunction with colleges, universities, and high schools across the country, will encourage and support events about "Global Warming Solutions for America" on or around January 31 2008.

RESOLVED: On that day, faculty are strongly encouraged to travel with their classes to attend scheduled programs about climate change or to discuss it with their own students in a classroom setting. The Focus the Nation organizing committee, not a part of WWC Student Caucus has agreed to work with interested faculty to develop appropriate material for their classes, and to insure that diverse disciplines are represented in symposium panels and workshops.
